

CSL-Clinic Dataset Release Agreement

Non-Exclusive License for Non-Commercial Research

Parties. This agreement is made between the XMUNLP laboratory (XMUNLP), acting as distributor of the CSL-Clinic dataset, and the research group or laboratory identified below (the Licensee).

Licensee research group or laboratory: _____

Institution and department: _____

Purpose and scope. CSL-Clinic contains sign-language videos and aligned gloss and Chinese text annotations for research on sign language recognition, translation, and related methods in clinical and healthcare communication. The non-public train and dev splits may be accessed by the Licensee only under this Agreement.

Submission: Email a scanned PDF of the signed agreement to ydchen@xmu.edu.cn with subject [CSL-Clinic Access Request] Applicant Name - Institution. Student applicants must copy the supervising signer.

Terms of Use

1. XMUNLP grants the Licensee a non-exclusive, non-transferable, revocable, and limited right to use the approved CSL-Clinic data for non-commercial research and education. This right is not limited to a specific research project.
2. The Dataset may not be used, directly or indirectly, to develop, train, evaluate, promote, or operate a commercial product or service. Separate written permission is required for any commercial or revenue-generating use.
3. The Licensee must not sell, publish, redistribute, sublicense, copy for another group, or otherwise provide any non-public part of the Dataset to a third party. Collaborators outside the approved research group or organizational unit must submit a separate application and receive approval before access.
4. Access must be limited to members of the Licensee research group or laboratory who need the Dataset for permitted use. The Licensee must use reasonable technical and organizational safeguards, including access control and secure storage, and must not upload non-public data to public repositories, public cloud folders, or services that retain or reuse submitted content.
5. The Licensee must not attempt to identify, contact, track, profile, or infer sensitive personal or medical information about any signer or other person appearing in the Dataset. The Dataset must not be combined with external sources for face recognition, biometric identification, or re-identification.
6. Images, video frames, clips, and annotations that could reveal an individual's identity must not be published in papers, presentations, demonstrations, websites, social media, or other public media without prior written permission from XMUNLP. Aggregate results and non-identifying analyses may be published.
7. The Dataset and any model trained on it must not be used as a substitute for qualified sign-language interpretation, medical advice, diagnosis, treatment, triage, or emergency communication. Any experimental system must be described as research and evaluated with appropriate human oversight.
8. The Dataset is provided without warranty. The Licensee is responsible for complying with applicable law, ethics requirements, institutional policies, and approvals. Access may be denied or revoked if the application is incomplete, the proposed use is outside scope, or these terms are violated.
9. XMUNLP reserves the right to issue the final interpretation of this Agreement.

Applicant Declaration and Signatures

We have read and accept all terms of this agreement. The supervising full-time staff member confirms responsibility for the Licensee group's compliance. A typed name is not a substitute for a signature.
